Leaders in Safety at Height

**Custom Safe Access Equipment**  
**Governmental Building**

## Project Overview

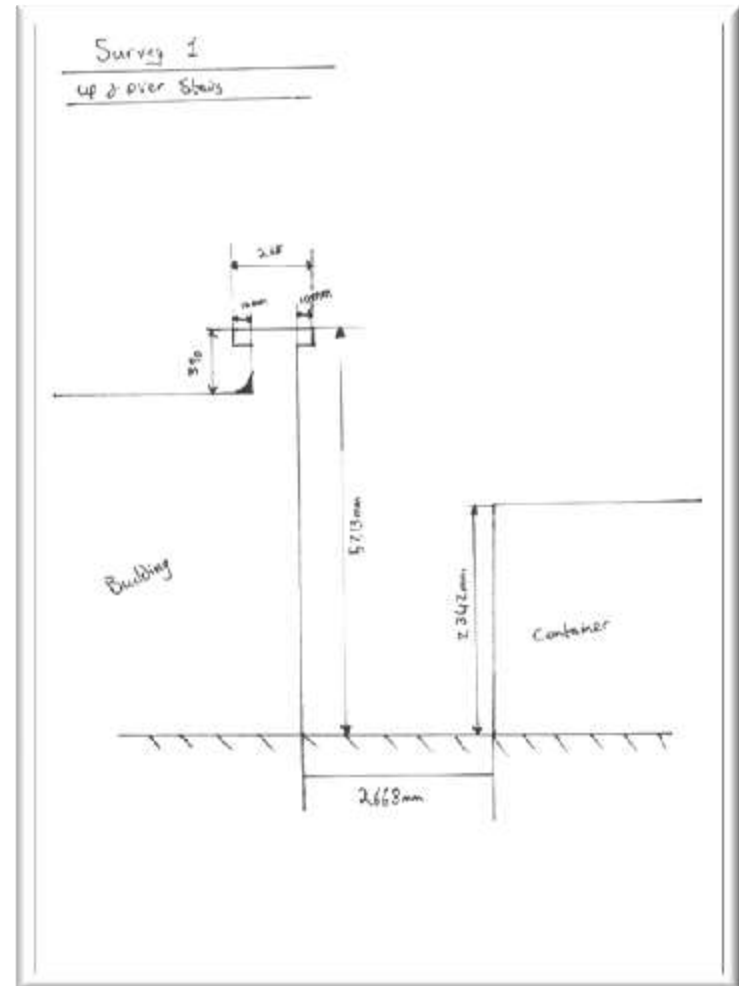

- Frequent access required for regular maintenance of mechanical and electrical plant equipment at roof level
- Existing 3m vertical ladder access to container roof and 6m vertical ladder access to high level roof with plant equipment
- Client unhappy with risk of carrying tools & replacement parts up existing vertical ladders
- Skyway provided 3D concept drawings for the client's approval showing the proposed solution prior to manufacture of any equipment
- All equipment manufactured in-house and installed by Skyway over two days with no disruption to clients daily operations
